

Natural, plant-based source of potassium from coconut water powder. It is an innovative way to formulate natural potassium into food supplements, with the additional benefits found in coconut water.

PRODUCT PROFILE SHEET

Potassium is one of the most important minerals in the body. It helps **regulate fluid balance, muscle contractions** and **nerve signals**.

A high-potassium diet may help **reduce blood pressure** and **water retention** and **support cardiovascular** and **joint health**.

Naturally low in calories, coconut water is an great natural source of potassium together with other essential nutrients. We source our potassium from spray-dried coconut water.

The additional benefits of Coconut Water

For many years tropical cultures have enjoyed the nutritional and hydration benefits of coconut water. It contains natural B vitamins and minerals - mainly magnesium and potassium - which are key electrolytes that need to be replaced for proper rehydration.

It is an excellent ingredient to create a functional beverage, as it offers an interesting alternative for sport nutrition products where hydration is required, because replenishment of fluids and electrolytes is crucial for avoiding dehydration and ensuring maximum performance.

Coconut water beverages are becoming extremely popular with health conscious consumers and are especially valued as an all natural, hydration drink.

Coconut water also contains **enzymes, antioxidants** and **phytonutrients** as well as **cytokinins**, plant hormones that may have anti-aging effects on human cells and tissues. It may also help to restore the natural pH balance in the body and pledge the effects of an acidic diet.
