goldenomega® Softgels

PLAY VIDEO

Our fish oil softgel capsules come in a variety of shapes, sizes and concentrations. These ready-made solutions provide a quick and easy way to launch or expand your Omega-3 supplement range. They are made using Golden Omega®, a leading brand in fish oil concentrates, sourced from South Pacific anchovies, with traceability independently verified by ORIVO.

PRODUCT PROFILE SHEET

Golden Omega® fish oil concentrates are pure quality omega-3s up to 700 mg/g EPA + DHA combined.

The purity of the oil is due to a unique technology, which allows Golden Omega® to remove unwanted compounds in the oil even below EU regulations.

In fact, the EE concentrates are Gardner colour 2 or below, and the TG concentrates are Gardner colour 3 or below which permits to have a softgel visually attractive in transparency and colour.

What makes the omega-3 in these finished products so unique?

Golden Omega® fish oil concentrates are recognised for their quality and purity. They are manufactured in a state-of-the-art facility in Arica, Chile, on the South Pacific coast.

Full control of sourcing and traceability enables Golden Omega® fish oil concentrates to be ORIVO-verified as pure South Pacific anchovy oil.

In addition, Golden Omega® fish oil concentrates are certified by Friend of the Sea®, Dolphin Safe® and MarinTrust. Golden Omega® has received Green-e™ certification for its use of renewable energy, including hydropower, solar and wind energy.

Product Advantages

- ✔ **Quick & easy way to get your finished product to market**
- ✔ **Our softgels are available in a variety of shape, sizes & options**
  Various DHA and EPA concentrations
- ✔ **Nice looking clear appearance**
  Quality you can see
- ✔ **Fish Oils certified by ORIVO as Pure Anchovy from the South Pacific**
- ✔ **High Quality Concentrates**
  Golden Omega® fish oils are extremely low in contaminants and oxidation parameters, thanks to the unique patented purification process of fish oil
- ✔ **Sustainability & Social Responsibility**
  Golden Omega® has established sustainability initiatives focused on traceability, responsible sourcing and community engagement

Sustainability

Golden Omega®, the manufacturer of the fish oil concentrates used in our softgels, is committed to responsible resource management and continuously works to improve the environmental efficiency of its operations. Golden Omega® collaborates with relevant authorities, industry stakeholders, and local communities to support responsible business practices and long-term sustainability initiatives.

Responsible Sourcing

Golden Omega® produces its Omega-3 concentrates from anchovy sourced from the South Pacific which are verified by third parties **(ORIVO verification).** Golden Omega® works with suppliers operating under recognised fishery management frameworks and supports responsible sourcing practices designed to promote the long-term availability of marine resources. Relevant third-party certifications are available upon request or through publicly available certification programmes.

Environmental Management and Resource Efficiency

- Golden Omega®'s production facility is located very **close to the fisheries** supplying its raw materials. This reduces transportation requirements for crude fish oil and allows drum assembly to take place on site, **reducing drum transport volumes by approximately 90%.**
- The manufacturing process is designed to **maximise utilisation of the oil fractions.** Materials not used in the production of Omega-3 concentrates are recovered and utilised in other industrial applications where appropriate.
- The production facility in Arica, northern Chile, operates using **electricity sourced from renewable energy**.
- A dedicated **seawater desalination plant** provides a reliable water supply for the facility and helps reduce demand on local potable water resources.

goldenomega® Softgels

Golden Omega® **continues to invest** in operational improvements focused on resource efficiency, recycling, emissions reduction, and responsible management of raw materials and utilities. This is one of the key reasons we selected Golden Omega® as the unique source for our omega-3 softgels.

Social Responsibility

Golden Omega® supports initiatives that contribute to **community development, education, environmental awareness, and cultural engagement** in northern Chile.

- **Collaboration with local technical institutes and universities** to support curriculum development and provide internship opportunities for students.
- **Participation in the "Zero Plastic Waves"** initiative together with NGOs and local authorities, including beach-cleaning activities and marine conservation awareness programmes.
- **Support for local sporting events** that promote active lifestyles and community wellbeing.
- **Sponsorship of cultural initiatives,** including the Arica Nativa Film Festival and the Andean Carnaval Con la Fuerza del Sol.
- **Participation in industry collaboration initiatives** that promote innovation, regional development, and value chain integration within the Omega-3 sector.

Approved Health Claims

The following health claims for EPA and DHA have been approved by EFSA (Commission Regulation (EU) 1924/2006 and 432/2012):

DHA and EPA

- Normal function of the heart (250 mg per day)
- Maintenance of normal blood pressure (3000 mg per day)
- Maintenance of normal blood triglyceride levels (2000 mg per day)

DHA

- Maintenance of normal brain function (250 mg per day)
- Maintenance of normal vision (250 mg per day)

DHA maternal intake

- Normal brain development of the foetus and breastfed infants (200 mg DHA plus the daily recommended intake of omega-3 fatty acids (EPA+DHA for adults which is 250 mg per day).
- Normal development of the eye of the foetus and breastfed infants (200 mg DHA plus the daily recommended intake of omega-3 fatty acids (EPA+DHA) for adults which is 250 mg per day).
