

Our Golden Omega[®] fish oil softgel capsules come in a variety of shapes, sizes and concentrations. They provide a quick and easy solution to help extend or start up your Omega-3 supplement line with high quality and sustainable branded fish oil concentrates.

PRODUCT PROFILE SHEET

Golden Omega[®] fish oil concentrates are pure quality omega-3s up to 750mg/g EPA + DHA combined.

The purity of the oil is due to a unique technology, which allows Golden Omega[®] to remove unwanted compounds in the oil even below EU regulations.

In fact, the EE concentrates are Gardner colour 2 or below, and the TG concentrates are Gardner colour 3 or below which permits to have a softgel visually attractive in transparency and colour.

What makes the omega-3 in these softgels so unique?

Golden Omega[®] fish oil concentrates are a step beyond quality and purity for omega-3s. These fish oil concentrates are manufactured in a state-of-the-art facility located in Arica (richest fishing ground in the world, in the South Pacific Ocean).

This guarantees full control of the source and traceability enabling them to be ORIVO certified 'Wild Caught Fish from the South Pacific'. Beside this, Golden Omega[®] Fish Oil Concentrates are also Friend of the Sea, Dolphin Safe and Marin Trust certified.

Golden Omega[®] is fully committed to sustainability and have received the Green-e™ certification for the use of clean and renewable energy, including hydropower, solar and wind.

Golden Omega[®] fish oils are extremely low in contaminants and oxidation parameters, thanks to the unique patented purification process of fish oil.
- ✓ **Sustainability & Social Responsibility**
Our partners Golden Omega[®] are fully committed to sustainability and support to local communities.

Sustainability

Golden Omega[®] maintain an ongoing, long-term commitment to environmental protection and the sustainable management of resources. This includes actions that exceed compliance with current regulations, as well as active cooperation with national authorities and organizations.

From Sustainable Sources

Golden Omega[®] produces all its Omega-3 concentrates exclusively from Wild Caught Fish in the South Pacific (ORIVO certified), with minimal impact on biodiversity. Golden Omega[®] products are Friend of the Sea, Dolphin Safe and MarinTrust certified for responsible fishing.

Environment Protection and Eco-Friendly Operations

- The production unit is close to the fisheries therefore, there is no need for transportation of the crude oil. Golden Omega[®] assembles their own drums at the facility which saves 90% transportation of drums.
- Their production process generates zero oil waste. Any oil fractions not used in their final products are sold as by-products for various industrial applications.
- Golden Omega[®] received the Green-e™ certification for the use of 100% clean and renewable energy in its facility based in the north of Chile, from Centre for Resource Solutions (CRS).
- Golden Omega[®] have built the first seawater desalination plant. This allows them to secure a stable water supply and cut Arica's potable water usage by more than 6,500 people's daily consumption

Social Responsibility

Golden Omega® subscribe to Global Compact Chile, an initiative lead by the united nations to promote sustainability which commits them to enforce specific principles, plans and programs to human rights, labour relations, environment and anti-corruption practices.

Golden Omega® leads the "Olas Zero Plástico" campaign. This initiative raises awareness in the community about the serious impact plastic waste causes on marine wildlife worldwide and promotes recycling and cleaning activities to preserve the animal life in the coast of northern Chile.

Research

They adapt and promote research and development of new solutions which has led them to be recognised as the fifth company in Chile with the largest value portfolio of intellectual property.

Approved Health Claims

The following health claims for EPA and DHA have been approved by EFSA (Commission Regulation (EU) 1924/2006 and 432/2012):

DHA and EPA

- Normal function of the heart (250 mg per day)
- Maintenance of normal blood pressure (3000 mg per day)
- Maintenance of normal blood triglyceride levels (2000 mg per day)

DHA

- Maintenance of normal brain function (250 mg per day)
- Maintenance of normal vision (250 mg per day)

DHA maternal intake

- Normal brain development of the foetus and breastfed infants (200 mg DHA plus the daily recommended intake of omega-3 fatty acids (EPA+DHA for adults which is 250 mg per day).
- Normal development of the eye of the foetus and breastfed infants (200 mg DHA plus the daily recommended intake of omega-3 fatty acids (EPA+DHA) for adults which is 250 mg per day).
