

PRODUCT PROFILE SHEET

According to market data, the global vegan supplement market is projected to reach a value of US\$ 4,830 million by the end of 2022, with an anticipated rapid growth rate of 11.3% Compound Annual Growth Rate (CAGR) from 2022 to 2032.

Recognising the importance of natural vitamins and minerals for vegans, who rely on plant-based sources for nutrition is important, but not only that, according to Innova Market Insights, the popularity of plant-based and vegan formulations is on the rise, appealing not only to those who follow to a vegan lifestyle but also to individuals seeking healthy nutrition.

These formulations can sometimes offer clean label and a natural taste making them attractive to a wider audience. The increasing use of botanical ingredients and a better understanding of their health benefits have led to a greater emphasis on traditional plant sources for dietary supplementation. Therefore our PlantNutra® range which provides exceptional solutions could be the choice for your next food supplement idea.

Alongside our scientifically validated branded ingredients, premium raw materials from our essentials range and top-quality minerals from our line, our PlantNutra® brand offers a specially selected range of plant-based botanical specialties, some of which allow for EFSA Approved Health Claims.
