

PRESS RELEASE, February 12, 2021

Golden Omega obtains the international certification, Green-e™

The Chilean leading manufacturer of Omega-3 concentrates, Golden Omega S.A., has received certification of the use of clean and renewable energy in its facility in Arica, north of Chile, from Center for Resource Solutions (CRS).

CRS has assessed the long-term contracts that Golden Omega has with its provider of power supplies, Colbún, and certified that the energy utilized in its facilities comes 100% from clean, renewable sources, including hydropower, solar and wind, which are in compliance with the strict requirements for the Green-e™ certification.

"We maintain a firm adherence to a responsible operation, sustainability of the resources and care for the environment. Obtaining this new international certification for a clean and renewable energy supply, is a new proof of this commitment", commented Jorge Brahm, Managing Director at Golden Omega.

"We are exporting our Omega 3 concentrates from Arica to the worldwide markets. This new certification is a reassurance for our clients and the consumers of their products that Golden Omega's fish oil concentrates are produced following the highest international standards", explained Claudio Aracena, Commercial Director at Golden Omega.

ABOUT GOLDEN OMEGA

Golden Omega is a Chilean Company focused on producing high quality Omega-3 concentrates up to 75% of EPA and DHA obtained from fish oil. Golden Omega's state-of-the-art production facilities are located in Northern Chile, close to the raw material source. This guarantees an assured supply of the best fish oil available worldwide, as well as freshness and quality.

ABOUT GREEN-E™ AND CENTER FOR RESOURCE SOLUTIONS

The Green-e™ certification program is run by the NGO Center for Resource Solutions and is the leading independent consumer protection program for the sale of renewable energy and greenhouse gas reductions in the retail market. CRS offers certification and verification services through Green-e™ Energy, a renewable energy certification program; Green-e™ Climate, a greenhouse gas emission reduction certification program; and Green-e™ Marketplace, a program that provides forward-thinking organizations a simple, internationally recognized logo they can use to communicate their renewable energy and climate commitment to their customers and stakeholders. To learn more about Green-e™ certified products and programs, visit www.green-e.org.

About Green-e®

Green-e® is the trusted global leader in clean energy and carbon offset certification.
